Benefits

- Breathing fresh air protects your health
- Actively seeks and destroys contaminants in the air and on surfaces
- Inhibits mould spores forming and growing in the room that the unit is in
- Increased productivity
- Creates a fresh, healthy feeling indoor environment
- Neutralises viruses, germs and bacteria and significantly reduces the risk of virus transmission and bacteria etc
- Reduced absenteeism in workplaces and schools
- Ensures your environment is clean and healthy 24/7
- Low energy with minimal impact on your energy bill

Features

- Plugs into existing outlets
- Economical and portable
- REME-LED™ Technology
- Ideal for small spaces
- Bi-Polar Ionisation
- Low power, long life
- No wiring required
- Low maintenance
- Ozone Free
- Advanced catalyst
- Washable filters
- Ultra-quiet operation

Saves You Money and Your Health

Most people spend over 90% of their time indoors. Unlike outdoor air pollution, nature cannot purify the air inside your building, so we have to give it a little help.

The REME-ION™ portable air and surface purifier is the latest advancement in air purification, using charged ions and an Advanced Oxidation Process to clean air and eliminate odours.

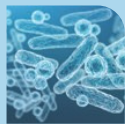

The REME ION™ improves air quality by efficiently neutralising pathogens, allergens, odours, mould, bacteria, and airborne chemicals (VOCs).

Employing REME-LED PHI™ technology, advanced oxidation and bipolar ionisation, the REME ION™ quietly cleans the air you breathe, whilst also sterilising all surfaces.

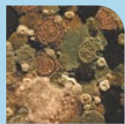

Protection From:

Viruses

Bacteria

Mould Spores

Dust

Pollen

Dander

VOC's

Clean your air in the same way as Mother Nature with the REME-ION™ by RGF Environmental air and surface purifier.

Using Bi-Polar Ionisation and an Advanced Oxidation technology, the REME-ION™ actively floods spaces with friendly ions and natural cleaning agents.

Many people are nervous and apprehensive about their living or working environments after months of living with COVID-19, particularly as we return to work and offices. This innovative product helps improve the living conditions of the home and office, by safely and effectively cleaning the air you breathe.

In independent tests RGF's REME™ technology and Advanced Oxidation Process was shown to be up to 99.99% effective at seeking out and neutralising the COVID19 (SARS-CoV-2) virus.

Specifications

Product Weight: 0.4kg | Electrical: 12 VDC 0.4 A

Power Consumption: 5 watts | Treatment Area: 20sqm

Technology: REME-LED™ with Bi-polar
